

A conference hosted by Olswang and Greenberg Traurig LLP

**OLSWANG GreenbergTraurig**

## **Open Source Summit**

**9 November 2007 – Queen Elizabeth II Conference Centre, London**

The software development and licensing landscape has changed, and the US are perceived to be leading the way. The Summit seeks to address this imbalance. An internationally recognised panel of speakers will consider:

- the origins and development of Open Source and GPL licensing
- IPR protection and risks of proprietary and Open Source licensing models
- Open Source risk management in the context of IPOs, M&A and joint ventures
- corporate Open Source policies and procedures
- what the future has in store.

This conference is the first Open Source event specifically targeted at CEOs, CTOs, General Counsel and those with primary responsibility for advising companies on the acquisition, development and licensing of technology.

The keynote addresses are by Open Source pioneer Bruce Perens and Sun's Chief Open Source Officer, Simon Phipps. The distinguished panel of speakers include representatives from Nokia, Symbian, Microsoft, Alfresco, Red Hat and Black Duck Software.
